

CALL FOR TUTORIALS

Important Dates

Proposals due date: Friday ~~20 July~~ 17 Aug 2018

Acceptance notification: Monday 2 September 2018

Abstract (100 ~ 150 words), short-bio(s) and photo(s) submission: Monday 24 Sep 2018

Camera-ready two-page extended summary submission: Monday 15 October 2018

Finalised tutorial slides/ notes submission: Monday 5 November 2018

[AusDM \(Australasian Data Mining Conference\)](#) is a premier Australasian conference that has been at the heart of both practitioners and researchers in data mining community. It is a great opportunity for the people in the field of data mining from Asia-Pacific region as well as other countries to meet, discuss and showcase their state-of-art and innovative work, ideas and activities related to data mining, data analytics, and applications.

We invite tutorial proposals for [AusDM 2018](#), which will take place at [Charles Sturt University's Bathurst campus](#) in New South Wales, from Wed 28 November to Friday 30 November, 2018.

We offer a waived registration fee for attendance to one presenter of each accepted tutorial topic. To increase the exposure of presenters' work, a two-page extended summary of the accepted tutorial will be included in the conference proceedings.

The accepted tutorial will be scheduled to present during AusDM 2018 conference as parallel sessions.

It is mandatory for at least one speaker of each accepted tutorial to attend and present the tutorial at AusDM 2018 conference. Otherwise, the accepted tutorial will be delisted from the conference website and the two-page extended summary will be excluded from the conference proceedings.

Guidelines for proposals

The topics of the tutorials are expected to align with those of the [main conference](#) and intended to attract a wide audience in the community of data mining. These topics include related research fields, applications or developed tools and software suites for data mining or data analytics. The content of tutorial should be able to provide introductory knowledge but also cover the important elements of the chosen topic in depth. It should be well-focused for three-hour or four-hour presentation.

Your tutorial proposal should contain the following documents. Please zip all the required documents and **email the zip file to both Tutorial Chairs** listed at the bottom of this paper.

- A PDF file that contain:
 - Title, abstract (100 ~ 150 words) and keywords
 - The name(s), affiliation(s), email(s), and short bio(s) of presenter(s) including the research interests and area of expertise and specifying who is planning to attend and present at the conference
 - Justification on the relevance to audience, application and impact
 - A list of previous venue(s) or conference(s) and audience size if the same or similar tutorial has been presented elsewhere

- A description of special technical equipment that the presenter(s) will need to bring to the conference venue for the presentation. Note that standard equipment such as projector and computer are provided at the conference venue to support the presentation.
- A PDF file for the two-page extended summary that describes the content of tutorial with a maximum of half page key references provided.
- A draft of PPT slides (or in PDF file) that could be covered in three-hour or four-hour presentation slot.

Review of proposals

The submitted tutorials will be reviewed by the chairs based on the following criteria. The chairs may also consult the experts or external reviewers on the proposed topic during the review process. All the submitted tutorials will be scored and ranked. A Maximum of two tutorials will be selected for presentation at the conference.

Factors to be considered include:

- The amount of the work that the presenters/authors have completed on the topic
- The completeness of the references covered in the tutorial
- The capacity (e.g. experience, background, etc.) of presenters/ authors in delivering of the proposed tutorial
- The interestingness of the proposed topic to AusDM audience
- The clarity of the tutorial content covered in the two-page extended summary and the draft slides
- The cohesion of tutorial slides that explain the topic to the AusDM audience
